

ANTICONGELANTE REFRIGERANTE 30%

Car care

Description

Antifreeze formulated from ethylene glycol and anticorrosive and anti-foam additives. Amine and nitrate free, recommended for all types of diesel and petrol engine cooling circuits. Especially for aluminium and aluminium alloy circuits. Offers good antifreeze, coolant and metal surface protection properties.

Properties

- Product designed for direct consumption as it contains water processed to avoid the risk of limescale deposit formation, corrosion and foam formation.
- Good thermal stability and prevents deposits and sludges forming in the cooling circuit.
- Compatible with joints and seals, thus preventing fluid loss risks.

Quality levels

- UNE 26-361-88
- ASTM D 3306 / D 4985
